

Connecting via Ethernet

Setting up your Internet

What do I need to get started?

- ✓ Ethernet cable

General recommendations

- Turn off file and printer sharing.
- Run any Software Updates for your computer or device and turn on automatic updates if available.
- Run Anti-Virus & Anti-Spyware software and turn on your firewall.
- Plug your computer into a surge protector (many power strips have one built-in).
- Use your device's Help system to find information on Network Setup.

Getting connected

Standard Ethernet setup

Plug one end of the Ethernet cable into the wall jack and the other end into the back of your computer. Once plugged in, you should be connected.

What if my Ethernet cable isn't working?

- Verify cable is firmly seated in wall jack and the back of your computer.
- Try a different Ethernet cable if you have one.
- Try a different wall jack.
